

## EDITOR'S INSTRUCTIONS FOR SOCIO-CULTURAL PROJECT

The audio for this project is of uneven quality. Much of the baby shower scene is simply unusable for audio.

You should **not**, however, dismiss the video that accompanies bad audio. In the case of the baby shower scenes, and the extended scene of the mother of the mother on the telephone with the mother of the father, these should not be overlooked because of unusable audio.

You might wish to think of MONTAGE in those situations.

Above all, think STORY and EMOTION. Ask yourself what is important, and what are the most eloquent moments. Do not make this a talking heads film.

Plan on 8-12 minutes duration.
